Description

A fantastic panoramic view from the loveliest summit of the Schober group is the reward for the longer climb. The via ferrata route is not that difficult, the length of the tour and the thin air above 3000m does however require a good level of fitness and mountain experience.

This via ferrata route is the finish of a high alpine mountain tour. The weather can change very quickly here (check your equipment!). Equipment: Complete via ferrata equipment and helmet. Crampons, ice pick and an additional safety rope for spring and winter climbs.

Upholder: ÖAV Sektion Lienz
