Via ferrata "Rote Säule" 2.820m

Challenging via ferrata at the "castle in the mountains"

Altitude profile

Via ferrata "Rote Säule" 2.820m

The most important at a glance

difficulty	length	duration	exposition	sea level starting point
D/E	350 m	1 h	O	2600 m

sea level entry point	sea level highest point	access time to the entry point
2660 m	2820 m	15 min

walking time descent	state: closed
1 h	

best season: JUN, JUL, AUG, SEP, OCT

access: Ascent to Sajathütte, from there north towards Sajatscharte. Continue left directly to the foot of the wall.

descent: From the summit to the south via graduated terrain into a wind gap (easy climb, section B is rope secured) and through a gully to the foot of the cliff. From there down a path and back to the alpine lodge.

Description

This via ferrata route which has been in existence since 1986 was expanded a few years ago to create a more extreme variant at the start (D/E – overhanging ladders). The “normal”

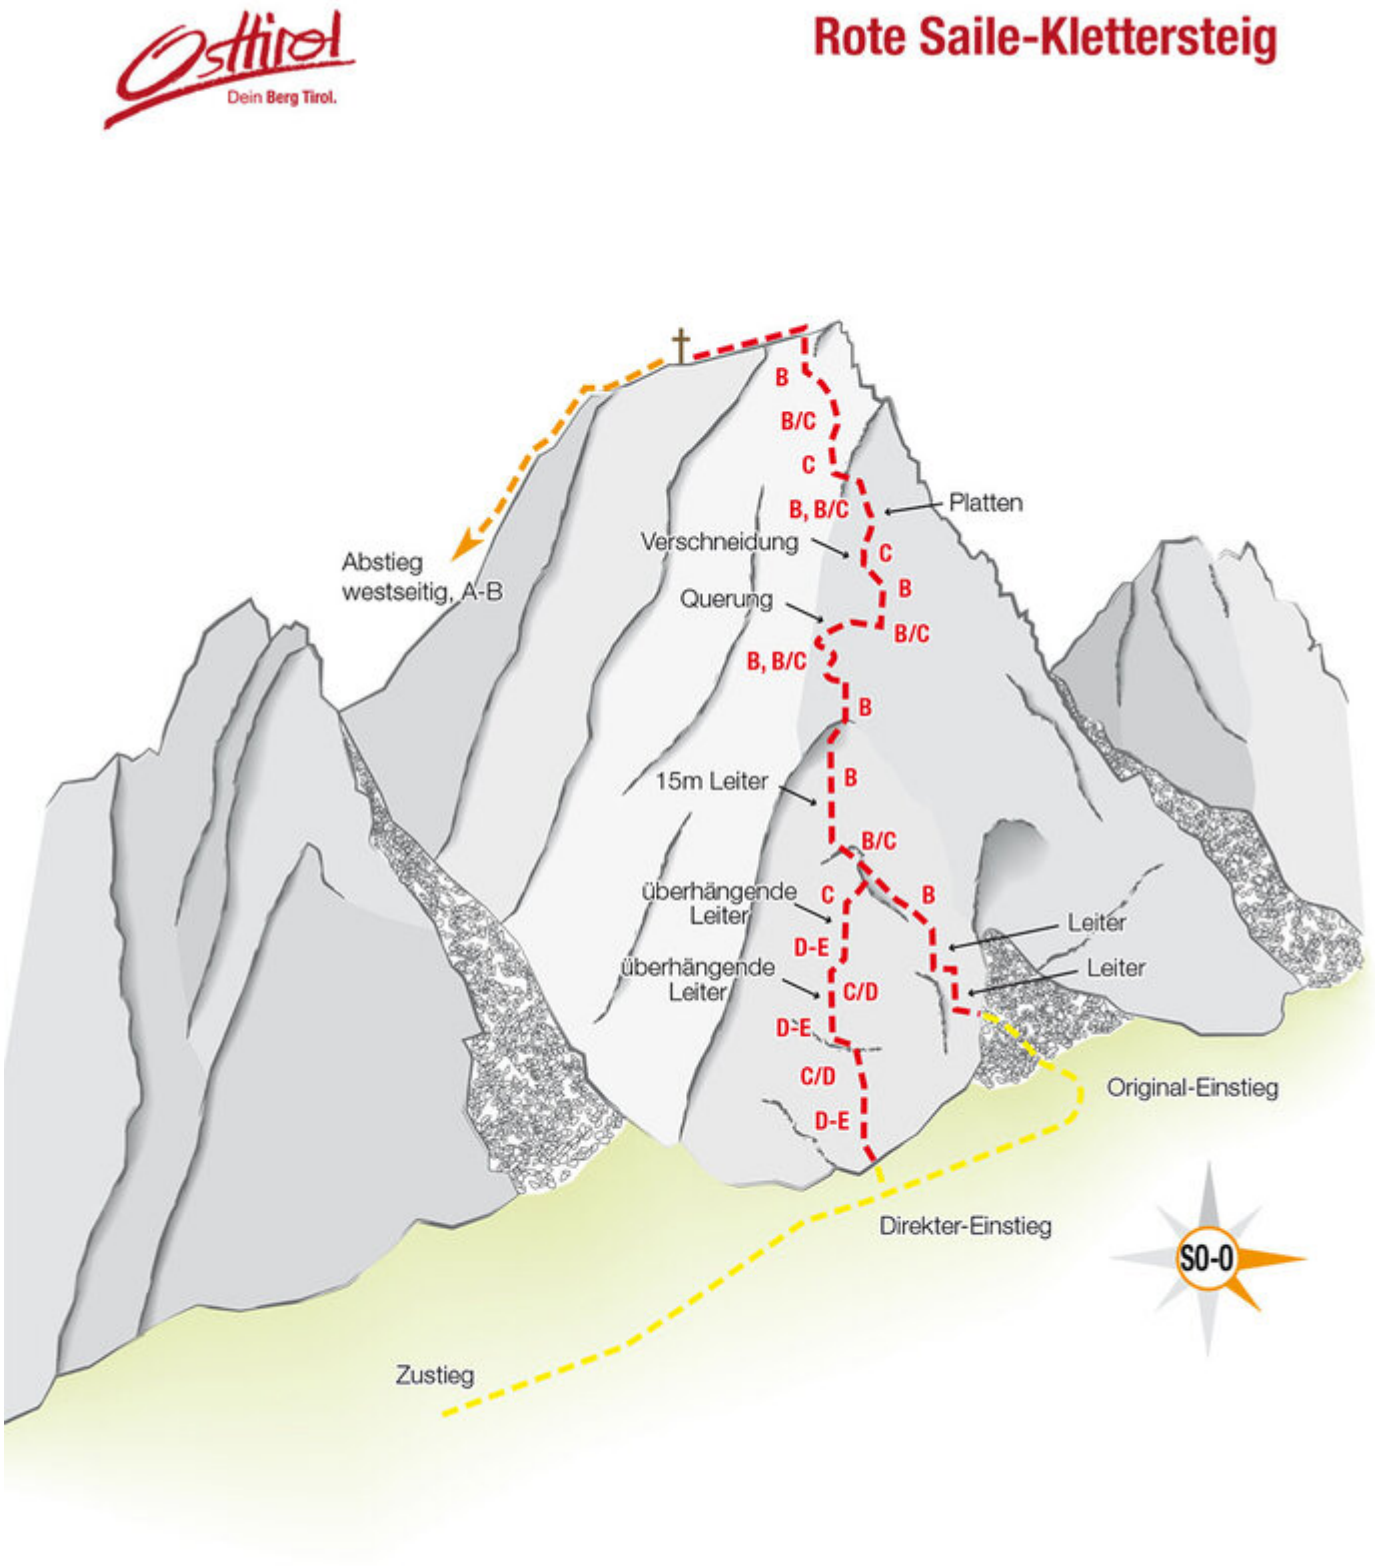

start in contrast has been set up at a difficulty level of B/C. Right before the longest ladder (17 m)

both variants come together again. Continue in the sturdy rock area, which is well-secured to the summit cross, where you can enjoy an outstanding panoramic view to the many three-thousand metre mountains in East Tyrol.

Difficult sections: C – difficult start - variants D/E.

Equipment: Complete via ferrata equipment and helmet.
