

Challenging via ferrata at the "castle in the mountains"

**Altitude profile**

**The most important at a glance**

<b>difficulty</b> D/E	<b>length</b> 350 m	<b>duration</b> 1 h	<b>exposition</b> O	<b>sea level starting point</b> 2600 m
<b>sea level entry point</b> 2660 m	<b>sea level highest point</b> 2820 m	<b>access time to the entry point</b> 15 min		
<b>walking time descent</b> 1 h	<b>state: closed</b>			

**best season:** JUN, JUL, AUG, SEP, OCT  
**access:** Ascent to Sajathütte, from there north towards Sajatscharte. Continue left directly to the foot of the wall.  
**descent:** From the summit to the south via graduated terrain into a wind gap (easy climb, section B is rope secured) and through a gully to the foot of the cliff. From there down a path and back to the alpine lodge.

## Description

This via ferrata route which has been in existence since 1986 was expanded a few years ago to create a more extreme variant at the start (D/E – overhanging ladders). The “normal”

start in contrast has been set up at a difficulty level of B/C. Right before the longest ladder (17 m)

both variants come together again. Continue in the sturdy rock area, which is well-secured to the summit cross, where you can enjoy an outstanding panoramic view to the many three-thousand metre mountains in East Tyrol.

Difficult sections: C – difficult start - variants D/E.

Equipment: Complete via ferrata equipment and helmet.
