Ski tour Tschadinhorn 3.017m

Description

From the car park in Oberlesach via the forest path to the Lesachalm at an altitude of approx. 1,900m. Pass the Tschamperalm, which lies above the path, and cross the steep slope ascending to the right (beware of hard snow!) until you reach a ridge. Now cross the ridge and the following slopes keeping to the right (east) up to the beautiful, large cirque with its small lakes. Finally via the short, steep southern flank to the summit. Be careful of cornices on the summit ridge.
